Enabling advanced CLI on HP V1910 Switches - Network Guy  
Enabling advanced CLI on HP V1910 Switches. 10. August 2017 22. July 2016 by Michel. I always thought, that the command line of the Comware OS based 1910/1920 switches are limited because they are "cheap". But I found out to enable the full CLI to configure the devices like a 5000-series Switch.

### Enabling advanced CLI on HP V1910 Switches - Network Guy

Recommended minimal configuration: In the factory default configuration, the switch has no IP (Internet Protocol) address and subnet mask, and no passwords. In this state, it can be managed only through a direct console connection. To manage the switch through inband (networked) access, the switch should be configured with an IP address and subnet mask compatible with the network.
