movement through a full range against full resistance). Knowledge of muscle anatomy is vital so that the joint can be positioned correctly and the tendon and muscle palpated so that a judgement on how much muscle action can be made.

### **Oxford Muscle Grading - Physio Newbies**

The Oxford Scale is a quick method of assessing and grading muscle power. A detailed knowledge of muscle anatomy is required to carry out an assessment appropriately. The Oxford Scale is a 0-5 scale which is then recorded as 0/5 or 2/5, sometimes with a + or - sign to indicate more or less power but not sufficient to reduce or increase the number.

### **The Assessment of Muscle Strength by Physiotherapists**

Muscle strength is scored on a scale of 0 to 5. 0 - No contraction; the patient is unable to even contract the muscle. This is scored as a zero. 1 - No movement but slight visible/palpable muscle contraction is present; contraction without movement is scored as grade 1 strength. 2 - Movement without gravity- i.e. movement with gravity eliminated.

left, prior to proceeding to the next muscle group in the list. Some muscle groups are listed here with anti-gravity testing, but for a weaker patient, these would be tested in a sidelying or supine position, per the table below (Testing Positions); the re-test for a weaker patient is indicated in gray scale.

## **muscle grading and testing procedures**

Test the strength of each muscle group and record it in a systematic fashion. It is wise to pair the testing of each muscle group immediately with testing of its contralateral counterpart to enhance detection of any asymmetries. Muscle strength is often rated on a scale of 0/5 to 5/5 as follows: 0/5: no contraction; 1/5: muscle flicker, but no movement

Many clinicians use manual muscle testing to assess muscular paresis and use the Medical Research Council scale of muscle strength (MRC-scale, also known as the Oxford scale) [ 1, 2] to quantify and communicate their findings. Manual and functional muscle testing procedures are quick, safe, simple to perform and require no specialist equipment.
