[Book] Rudman Study Guides Chapter 29

Anatomy is one of the most difficult subjects you will have to learn during your studies. It consists of two main divisions: macroscopic (or "gross" anatomy) and microscopic anatomy.The former deals with large structures that are mostly seen with the naked eye, while the latter involves the study of tissues and their organization into organs and systems on a microscopic level.

Human anatomy and histology study guide | Kenhub

The purpose of this study guide is to facilitate your studying by giving you lists of many of the terms and structures that you will be responsible for knowing. This study guide is divided into two parts. The first part is intended primarily for use in lecture and the second part is intended primarily for use in lab.
